## 1. MOM- ACE Visit

### Content

1. ACE- MOM Visit
2. SPF ad CNB visit at STL
3. ACE Engagement to STL residents
4. Good Friday prayer and Easter Sunday Celebration
5. Dengue Alert, Stay vigilant
6. Pest Control Operation

On 10 April 2025, STL had the pleasure of hosting a visit from MOM ACE. The primary objective of this visit was to share STL’s comprehensive emergency response plan with MOM, focusing on preparedness for potential riots and fires.

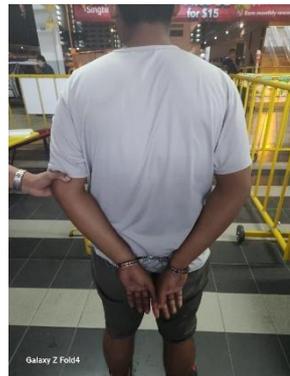

The session was marked by a healthy exchange of ideas, fostering collaboration and mutual understanding between STL and MOM ACE. Both teams engaged in insightful discussions, exploring various strategies and best practices to enhance emergency response capabilities.

The visit not only strengthened the partnership between STL and MOM ACE but also underscored the importance of proactive planning and effective communication in ensuring safety and security for our residence.

## 2. Singapore Police Force (SPF) and Central Narcotics Bureau (CNB) visits at STLodge

On 9 April 2025, officers from the Singapore Police Force (SPF), Central Narcotics Bureau (CNB), and Immigration & Checkpoints Authority (ICA) conducted a joint operation. The objective of the operation was to apprehend residents who may have violated the law through the use of duty-unpaid tobacco, alcohol, or drug abuse.

STL’s management extends its gratitude to SPF, CNB, and ICA for their continued efforts in maintaining a safe and secure environment for all foreign workers. These workers make significant sacrifices to support their families through their hard work, and ensuring their safety and well-being remains a top priority.

### 3. ACE Engagement to STL residents

On 27 April 2025, STL collaborated with MOM-ACE to visit our residence during their rest day. These impromptu interactions provided a relaxed atmosphere where residents felt comfortable sharing their experiences, problems, and suggestions regarding their stay at our dormitory. The visit was a valuable opportunity for both STL and MOM ACE to gain insights directly from the residents, fostering a sense of community and mutual understanding. This initiative highlights STL’s commitment to continuously improving the living conditions and overall well-being of our residents. We appreciate the willingness of MOM-ACE to engage with our community and look forward to more such collaborative efforts in the future.

### 4. Good Friday Prayer and Easter Sunday Celebration

Our STL management organized Friday prayer sessions for Muslim residents, highlighting the multiracial and religious harmony within our foreign worker community.

18 April 2025 is Good Friday, a Christian public holiday, is a time for rest and reflection.

## 5. Dengue Alert: Stay Vigilant at STLodge

The National Environment Agency (NEA) has recently intensified checks at STL, with a particular focus on common areas. This highlights the continued risk Dengue poses to our community.

### What You Can Do:

We urge all **staff and residents** to remain vigilant and take the following preventive actions seriously.

- **Eliminate stagnant water** in and around your living and working areas.
- **Clear and cover containers** that can collect rainwater.
- **Keep common areas clean** and free of litter.
- **Apply mosquito repellent** and wear long-sleeve clothing when possible.

Let's work together to keep STL safe and Dengue-free. Your cooperation is vital in protecting everyone's health.

## 6. Pest Control Operation

As part of our ongoing efforts in maintaining a clean and hygienic environment for all residents, a full extermination exercise was recently carried out to address cockroach infestation in the Kitchen Tower Lockers across all clusters.

Residents are reminded to keep lockers clean, dispose of food waste properly, and report any pest sightings to management.

Professional pest control teams were engaged to treat affected areas and implemented preventive measures. Regular fogging is also carried out to control mosquito breeding and reduce the risk of mosquito-borne diseases.

Let's work together to keep STL safe and pest-free.
